Experience

Portfolio: http://www.igoramidzic.com/

Diamond Media Solutions: Digital Specialist (June 2017 – September 2017)
- Hands-on with Angular/NodeJS CRM beta development.
- Added success/error handling to forms for a quality increase in user experience
- Created support modal linked through Slack for instant user-to-support communication
- Converted graphics slices into HTML emails

Internship at Freenters Inc.: https://www.freenters.com (Spring Semester 2017)
- Refactored 80%+ pages into separate Angular components for reusability
- Rebuilt frontend – converting from css to sass for variable organization

Trello Replica: http://www.tr.igoramidzic.com
- Built Trello Application's frontend from a PSD on dribbble.com from scratch.
- Built with Laravel and MySQL – user can perform all CRUD operations.
- User authentication and persistent session storage.

Utilitan – Money Management App: https://utilitan.herokuapp.com (in progress)
- Built with Angular4 and Google's Cloud Firestore database
- Track monthly income, transactions, and bills
